

Vivsa-Live Healthy Planner

Project Information

Name of the Organisation	HTL Leonding
Project Title	Vivsa
Project Summary	A Website to help you manage your Health
Project Timeframe	November-June (Schoolyear 2019/20)
Prepared by	Edina Abazovic, Flynn Obermaier

Project Summary

Why are you doing this project?

Because we want to make overall Health easier to manage and inform about the Importance of Self-Care. There are countless websites with health tips and information, but we have made it our task to summarize them clearly and understandably. A good physical and mental condition can drastically change work performance and thus also the well-being of yourself. This project requires a lot of research and text- editing, though the design of the website is as important.

What will you be doing?

We will create a website that summarizes all important facts and information in a clear and understandable manner and has tasks and tips for you.

How will you be doing it?

As described in the specifications on Github

Where will it be done?

The project is partly done at school and partly at home, but because of the prevalent pandemic (Covid-19), most of it will be done from home

How long will it take?

The rest of the Schoolyear
September 2019 - 16th of June

How much will it cost?

(Currently) Nothing

Project Methodology

Project Risk Management

-closed school due to Covid-19

- omission due to illness
- cancellation of School

We create a to-do-list every week which we will work through until next time

Project Costs

None

Conclusion

Our project is intended to give each individual a small overview of all important topics related to health. It will be a clear and nice looking website where you can learn a few new things and maybe get a food for thought

Appendix
